SES Volunteers assisting in Murray Bridge

SA State Emergency Service (SASES) volunteers have been working overnight and today assisting SA Water with the distribution of bottled water to the community of Murray Bridge after water supply to the city was disrupted.

SES crews have been delivering palletised water to nursing homes and the Mobilong Prison, as well as managing the two distribution points for bottled water to the public at Railway Terrace and the SES Unit on Thomas St, in Murray Bridge.

SA Water Security/Emergency Manager Jim Rishworth and SES Commander Derren Halleday would like to thank the SES volunteers from Murray Bridge and Adelaide for their fantastic support to the Rural City of Murray Bridge.

SA Water crews continue to manage the situation and members of the Murray Bridge Community requiring further assistance should contact the SA Water Customer Call Centre on 7424 2777 or monitor the SA Water Website 'sawater.com.au' for updates.

Media enquiries regarding the SES involvement in assisting SA Water may be directed to the SES State Duty Officer Andrea Geytenbeek on 8463 4288.

SA Water advises that the water coming through the taps is filtered as normal and is fine for drinking and cooking.
