

**Event Name:** River Murray: Cadell to Mannum

**Time Message Issued:** 10:00

**Date Message Issued:** 25/11/2016

## FLOOD ADVICE MESSAGE RIVER MURRAY SHACK AREAS

The State Emergency Service (SES) advises that, as a result of the recent high rainfall, flows in the River Murray are increasing. Predicted water levels are likely to cause minor flooding in the shack areas between Cadell and Mannum.

Shack areas that are likely to be impacted in coming weeks include Walker Flat and Bowhill. Shack areas currently impacted are Morgan, Brenda Park, Scotts Creek and South Punyelroo with flooding occurring to some low lying properties.

Flows into South Australia are currently 91 GL/day and will increase to around 95 to 100 GL/day during the coming week. Peak flows are expected to reach the shack areas in late December.

Owners of shacks in these locations should follow their Emergency Flood Plan now.

- Prepare your family and property for flooding in these areas.
- Move items of value to a safe place.
- Never walk, ride or drive through floodwater, including water affected causeways.
- Be aware that large debris may be carried downstream and may pose a hazard to water based activities.
- Stay away from the banks, if travelling on the water, to avoid submerged structures such as jetties and benches.
- Regularly monitor river levels in your local area to avoid becoming isolated by floodwaters.
- Camp on higher ground away from the river bank.

For SES assistance during a flood phone 132 500. If the matter is life threatening call triple zero. For current warnings go to the Alert SA website at [www.alert.sa.gov.au](http://www.alert.sa.gov.au) and listen to ABC radio for updates.

For more information on River Murray flooding check the SES website at [www.ses.sa.gov.au](http://www.ses.sa.gov.au). River Murray Flows Reports and mapping can be found on the WaterConnect website at [www.waterconnect.sa.gov.au/River-Murray](http://www.waterconnect.sa.gov.au/River-Murray).
